NARCIS - more than a gateway to Open Access publications in The Netherlands

Elly Dijk

KNAW Research Information

Open Access Infrastructures: the Future of Scientific Communication, Athens - Greece,
15 December 2008
Royal Netherlands Academy of Arts and Sciences

Academy's mission:
- To ensure the quality of scientific research in the Netherlands
- To promote the open accessibility of scientific information

Mission of my Department:
- National focal point of research information

Member of EuroCRIS: www.eurocris.org
Outline

- Dutch Infrastructure for Research Information
  - Open Access movement in The Netherlands
- Dutch scholarly portal NARCIS
- Digital Author Identifier - DAI
- Joining CRIS, OAR and e-Data: Barriers
- Further developments
- Conclusions
Academic Information Domain

Based on: [Knowledge Exchange Logo]
Dutch Academic Information Domain
Heaven?
Every university and the Academy has its own CRIS: Metis

Content:
✓ Researchers: expertise, research data and workplaces
✓ Research Institutions: Profiles and Addresses
✓ Research Programmes and Projects
✓ Bibliographical information on research results
National CRIS: Dutch Research Database

Sources:
✓ University systems - Metis systems
✓ Other research institutions
✓ National Research Council

Content:
✓ Research Programmes and Projects
✓ Research institutions
✓ Researchers

Data model:
• CERIF - Common European Research Information Format developed by EuroCRIS
Open access movement in The Netherlands

- Berlin Declaration on Open Access to Knowledge in the Sciences and Humanities - October 2003
  - Signed by the Academy - 2004 -, the universities, and the National Research Council

- **Golden route** of OA publishing: OA journals
  - 28 Open Access Journals in The Netherlands

- **Green route** of Open Access publishing: repositories
  - Part of DRIVER - Digital Repository Infrastructure Vision for European Research
Publications Repositories

- National DARE programme - Digital Academic Repositories
- Better access to the results of publicly funded research
- By development of institutional repositories: universities, Academy, National Research Council, smaller research institutes
- Long term preservation by the National Library
- Coordinated by SURFFoundation
Publications Repositories

- 23 Open Access Repositories
- 165,000 full-text publications
- Subsections: *Cream of Science and Promise of Science*
E-Data repositories

- The universities don’t have e-Data repositories
  - Researchers don’t take good care of their research data
  - Keep information in their computer
  - Don’t take care of preservation
  - Don’t like to share their data

- E-Data Institute DANS - Data Archiving and Networked Services
DANS
Data Archiving and Networked Services

- Repository called EASY - Electronic Archiving System
- Data themselves available under the conditions specified by the depositor
- Humanities and Social Science

Table F.1
Gross National Income by Component, 1807-1913
(millions of guilders, current prices)

</table>
Reality: No Heaven but NARCIS

- Research institutes
- Dutch Research Database (KNAW)
- Research Council NWO
- Metis (university)
- Repositories publications
- Repositories E-data
- NARCIS (KNAW)
NARCIS (Daffodil): Dutch Scientific Portal

- National Academic Research and Collaborations Information System

- Harvests records:
  - Dutch Research Database
  - Academic repositories
  - E-Data from DANS
Content NARCIS

- **Dutch Research Database:**
  - Expert database: 10,000 researchers
  - Portal of Professors and associate professors: 7,500 names
  - About 36,000 names of researchers
  - Project descriptions of current (20,000 records) and completed research projects (22,000 records)
  - About 3,200 records of university or non-university research institutes

- **Open Access Repositories:** 165,000 full-text publications

- **DANS:** Over 2,000 datasets
From a portal to a Dutch Academic Information Domain

- One portal to research related information
- All three systems searchable simultaneously
- Makes advantage of the real situation

**but:**
- No relation between the objects in the different systems!

**Solution:**
- Persistent Identifier for Persons
Why is a persistent identifier for persons needed?

- Identifying persons: same name/name variations
- Merging information (e.g. publications) from different sources
- Keeping track of people across institutes, projects etc.
- Linking persons with other entities, e.g. institutes, research, publications
Overview of persistent identifiers for persons

- Social security number
- Authority records or name lists of (national) libraries
- OpenID - http://openid.net/
- Scopus Author Identifier
- ResearcherID - http://www.researcherid.com/
- Digital Author Identifier - DAI
What is a Digital Author Identifier - DAI?

- Digital Author Identifier is a unique number
- Assigned to every author who has been appointed to a position at a university or research institute
- In the Netherlands: a national number
Implementation of the Digital Author Identifier

- Co-operation of all Dutch universities, Academy and Dutch Research Council
- Creating a thesaurus of author names with corresponding DAI within the OCLC-PICA library system
- Matching DAI and author names in all three research related information systems
- 40,000 unique author names with DAI’s
NARCIS provides access to 152,138 scientific publications, over 2,100 datasets, and information on researchers (expertise), research projects and research institutes in the Netherlands.

- query: 'meeus'
- 38 results.

Active as
- Professor Pedagogical Sciences (UU)
  - Chair (CN) Adolescent Psychology
  - Chair (NL) Menswetenschappelijke studie van de jeugd
  - Phone 461-30-2522812
  - Email w.meeus@fss.uu.nl

Datasets
- CONAMORE (Conflict and Management of Relationships) Adolescent study: Longitudinal survey - ongoing since 2001
- Adolescent conservatism 1995; Adolescent conservatism 1995

Open Access Publications
- Co-Occurrence of Depression and Delinquency in Personality Traits
- Verandering in persoonlijkheid en shock pedersen: de adolescenten
- Separation-individuation revisited: On the interplay of parent-adolescent relations, identity and emotional adjustment in adolescence
- Attachment in adolescence: A social relations model analysis
- The reciprocal relationship between early adolescent attachment and internalizing and externalizing problem behaviour
- Gehechtheid en internalisering en externalisering probleemgedrag bij adolescenten
- Leefstijlgebreide veranderingen in kwaliteit van gehechtheid van adolescenten aan vader en moeder
- Personality-reared parental rejection and problem behaviour in adolescence
- Een onderzoek naar het verband tussen ouderlijke afwijking en depressie en agressie bij adolescenten
- How do vocational and relationship pressures and identity formation affect adolescent mental health?

Current research
- Supervisor The dynamics of identity formation in adolescence
- Project leader Research on Adolescent Development and Relationships
- Coordinator Research on Adolescent Development and Relationships
Joining CRIS, OAR and e-data: Barriers

Technical barriers are not the main issues
✓ Interoperability:
  ➤ Using OAI - PMH protocol
✓ Exchange formats:
  ➤ DC, DIDL and MODS for repositories
  ➤ CERIF based XML for CRIS

▪ Organizational issues are important
✓ Cooperation:
  ➤ To make appointments about formats, deadlines, implementation
✓ Willingness:
  ➤ To assign Digital Author Identifiers
  ➤ To fill the CRISs and the repositories
The Future

- **Open Access Year 2009:** More full-text publications in the repositories

- Publication lists - harvesting of the “bibliographic only records”

- RSS service for the researcher’s website

- Enhanced publications for the international DRIVER project - Digital Repository Infrastructure Vision for European Research

- Metadata store (NARCIS becomes a National Repository)

- The technical universities are working on a repository with e-data for the technical sciences
2009: Open Access Year in The Netherlands

- Coordinated by SURFFoundation
- In cooperation with the Academy, National Research Council and all the universities

- Open Access rOAdmap 2009:
  - Communication: website, fact sheets, press releases, movies, conferences, presentations, et cetera
  - Grass root projects for promoting open access
  - Involvement of researchers
  - Copyright issues

- No mandating!
Conclusions

- It is possible to create a Dutch Academic Information Domain even when the systems are not connected
- Need for integration on some level: Digital Author Identifier
- To create a Dutch Academic Information Domain the greatest challenges are organizational
- So maybe Heaven doesn’t exist in the Dutch research infrastructure, but we have NARCIS!
Thank you for listening
